

GREEN GAS CERTIFICATE

Certificate No. 2023-4950-0001

We hereby confirm
Oskar Frech GmbH & Co. KG
Schorndorfer Straße 32
in 73614 Schorndorf

In cooperation with:

the climate-effective compensation of CO₂ emissions caused by the use of natural gas in heating systems.

The CO₂ emissions are compensated through the project portfolio of KlimalInvest Green Concepts GmbH. The supported projects are officially registered, follow the rules of the Kyoto Protocol and are additionally certified according to the strict requirements of the independent and non-profit Verified Carbon Standard Association (VCS).

By using green gas, the climate-impacting compensation of at least 945 tons of CO₂-emissions is forecasted. The Oskar Frech GmbH & Co. KG is expected to achieve climate neutrality of the calculated gas consumption of 4.000 MWh in the period from January 1st 2023 to December 31st 2023.

The issuance and cancellation of CO₂ reduction is carried out through certified international registers and officially confirmed.
